

MARCEL...THEN CAME PONCHO

At this time, Marcel at 8 or nine months of age is well intergrated with his monkey friends at Chipangali. We hear of his progress regularly. It will be some time before he is released as it takes many months if not years to build up a full troop with the correct number of adults, teenagers, youngsters as well as themale to female ratio.

By now, Caroline has made a name for herself as a 'monkey rehab person'! At this time, she is devoting her time to "PONCHO" a baby vervet 'snatched' from it's mother to sell as a pet. Thank goodness Sarah Carter from Bally Vaughn got involved, confiscated the monkey and called Caroline to see if she had the time to 'sort Poncho out' who had been near death by the time Sarah removed him. PONCHO came to us as a very depressed and unresponsive, terrified little boy.

Two months later, Caroline having worked her animal magic again, Poncho is just about ready to go and join Marcel at Chipangali. When we find the fuel to get him there that is!
